Small	No	Any price	Can have a loss 🔻	High	Any	Any Place	High
	,	,	<b></b> :	,	,		he gain.
What size companies do you prefer to invest in?	Do you prefer that the company have a dividend?	Do you have a maximum price you will pay for a stock?	Do you care if the company is operating at a loss?	How fast a growth rate should the company have?	What is your preference on the price to earnings ratio of the company?	Where do you prefer the stock price to be relative to its high and low for the year?	How much risk do you want vs. gain? Note: The Higher the risk, the higher the gain.

# PowerOptions

## luming options into decision

Your option has fallen in price to less than 20% of its original costs. There are several alternative actions, which may be appropriate to consider at this time:

Possible actions:

1. If there is only about one week left to expiration, it may pay to just wait for expiration to avoid the cost of buying back the option.

2. Consider buying back the option with the intent of rolling to a lower strike price for the next write.

3. Consider buying back the option with the intent of rolling out to a later month, either now or when the stock rises again.
